

MT-50 Sticker Labeling Machine

### Introduction

MT-50 model Horizontal type bottle Labeling machine, in order to achieve rationalization of production target and design. The machine comes with automatic labeling process, simple operation, high speed running, accurate labeling position, beautiful labeling. The machine can be used for pharmaceutical, chemical and foodstuff Industry labeling.

MT-130 Horizontal labeling machine

### Introduction

This device is suitable for circular bottle labeling requirements in dairy, food, pharmaceutical, daily chemical, and other light industry industries. It has functions such as easy operation, strong compatibility, low maintenance cost, and multiple materials that can store parameters to save adjustment time.

### Data

| Driver Motor              | Stepping motor                   |
| Operation                 | Right or left                    |
| Running speed (PCS/min)   | 100-150                          |
| Maximum diameter of label | Height < 150mm<br>length < 300mm |
| Labeling accuracy         | ±1%                              |
| Power supply              | AC220V±10% 50HZ, <1kw            |
| Overall Size (mm)         | 1800*800*1650                    |

MT-200 Automatic Round Bottle Labeling Machine

### Introduction

MT-200 model vertical type round bottle Round Bottle Labeling machine, in order to achieve rationalization of production target and design. The machine comes with automatic labeling process, simple operation, high speed running, accurate labeling position, beautiful labeling.

### Data

|                           |                   |
|---------------------------|-------------------|
| Model                     | MT-200            |
| Driver Motor              | Stepping motor    |
| Operation                 | Right or left     |
| Running speed (PCS/min)   | 10-200            |
| Maximum diameter of label | 350mm             |
| Coil diameter             | 75mm label        |
| Weight                    | 200kg             |
| Power supply              | AC220V 0.5Kw 60HZ |
| Overall Size (mm)         | 2000*1300*1500    |

MT-300 Automatic Front&Back sides Labeling Machine

### Introduction

MT-300 model labeling machine suits for label on the front and back sides of different kinds objects, such as round bottle, flat bottle, square bottle, cans, jars, carton and so on.

### Data

|                                  |                                                           |
|----------------------------------|-----------------------------------------------------------|
| Model                            | MT-300                                                    |
| Driving Mode                     | Step motor                                                |
| Operating direction              | Left or Right                                             |
| Capacity(pcs/min)                | 30-120                                                    |
| Conveyor speed (m/min)           | ≤40                                                       |
| Labeling Accuracy                | ±1.0 mm                                                   |
| Label application                | Adhesive sticker, opaque label                            |
| The inner diameter of label roll | 76 mm                                                     |
| The outer diameter of label roll | 350 mm(max)                                               |
| The application of label         | Height: 15-300 mm length 15-300 mm                        |
| The application of label objects | Can customizing                                           |
| Printer use air                  | 5kg/cm <sup>2</sup>                                       |
| Power (w)                        | 800W                                                      |
| Voltage (In China)               | AC220V 50/60HZ Single side (Can customized as buyer need) |
| Weight (kg)                      | 280kg                                                     |
| Machine size(mm)                 | 2400 (L) 1300 (W) 1500 (H) mm                             |
