

DPT-240 Automatic Plastic Ampoule Forming Filling And Sealing Machine

DPT-118 Automatic Plastic Ampoule Forming Filling And Sealing Machine

Introduction

DPT-Series machine is specially designed for filing different shape and size Plastic Ampoule. The machine is widely used in Cosmetic, Food, E-Liquid and Pharmaceutical field for different viscosity liquid or paste filing and sealing.

Application

Oral, liquid, pesticide, perfume, cosmetics and Jams etc.

Performance

1. High-speed high-precision motion controller, Controlled by PLC, Stepless frequency conversion, servo motor puling system.
2. Human-machine interface device, simple operation, color mark function.
3. The filling heads will no leak, foam and spill out.
4. Contact part adopt stainless steel 316L, and the whole body stainless steel 304, meet the requirement of GMP standard.
5. The main pneumatic components and electrical appliances use imported accessories.
6. Electronic peristaltic pump filling system and mechanical filing, high filling accuracy, easy adjusting.
7. The bottom of the bottle can be flat and stand-up.

Data

Model	DPT-118	DPT-240
Max forming depth	12MM	12MM
Cutting speed	0-25times/minute	10-25times/minute
Packing material	PET/PE, PVC/PE(0.2-0.4)*120MM	PET/PE, PVC/PE(0.2-0.4)*120MM
Filling Volume	1-50ML	1-50ML
Total Power	6KW	8.5KW
Power supply	220V-380V / 150HZ	220V-380V / 150HZ
Machine weight	850KG	1200KG
Dimension	2300*850*1450MM	3100*850*1450MM
